

AAXICO PMA PRODUCT RELEASE

AAXICO Technical Services (ATS) is pleased to announce PMA on the following Part Numbers:

Part Name	ATS PMA P/N	Approved Replacement for P/N	Replacement for OEM	Installation Eligibility Model
Lens Assembly	11-4441-1ATS	11-4441-1	Boeing	B737 Series B757 Series
	11-4441-3ATS	11-4441-3		
	11-4441-5ATS	11-4441-5		

Advantage: Product Improvement and Cost Savings

The LENS ASSEMBLY is a transparent lens with a silver colored paint scheme that covers the sidewall light assembly. The sidewall light provides illumination in the cabin along the sidewall of the aircraft. The sidewall light is manufactured in varying lengths to suit the aircraft cabin configuration. The LENS ASSEMBLY is installed with spring tension clips and screws. The clips grab on to the edge of the sidewall panel providing positive lens retention and the screws secure the lens to the sidewall light. During periodic visual inspection and checks of the cabin lighting system along the aircraft sidewalls, the LENS ASSEMBLY may show signs of cracks, scratches and/or discoloration. However the main reason for removal is for UV degradation which causes a yellowing of the LENS ASSEMBLY. In such cases, the LENS ASSEMBLY is replaced with a new part. With the ATS PMA, the material has been improved to enhance UV resistance and resist material degradation.
