

AAXICO

PMA PRODUCT RELEASE

AAXICO Technical Services (ATS) is pleased to announce PMA on the following Part Number:

Part Name	ATS PMA P/N	OEM P/N	OEM	Eligibility
Auto-Transformer Assembly	4254964ATS	4254964	Teleflex Syneravia	A300 Series A300-600 Series A310 Series

The AUTOTRANSFORMER ASSEMBLY functions to reduce the Aircraft 115 V, 400 Hz to 13 V and 400 Hz to operate the 250 W Taxi Lights and Wing Icing Inspection Lights on the A300 and A310 Aircraft for both the right and left side of the aircraft.

Advantages of Product Improvement: As part of making the design more efficient, the flux density has been raised, the number of wire turns have been reduced and changes to the wire gauge have been made. PTFE Shrink Tubing, Fiberglass Tape and High Temperature Ring Terminals have been introduced to improve the design which has yielded a 23% reduction in operating temperature. This improves performance and reliability, while still maintaining the fit-form-function requirements of the assembly. There are also cost savings over the OEM part.

Please contact any AAXICO office for pricing or a payback analysis.
